TEKTRENCH SYSTEM TAKING YOU OUT OF THE TRENCH.

The latest technology for constructing pipeline breakers and pillows.
The TekTrench System is a pumpable two-component system used to increase pipeline installation efficiency.

System Advantages:

- Improves worker safety, requiring fewer workers to be in the trench
- Increases productivity, reducing costs
- Supports cathodic protection, extending pipeline life expectancy
- Cost-effective alternative to polyurethane foams or sandbag installation
- Multiple available pumping options
- Fire-resistant, water-permeable material
 - Grade A, (FS) Flame Spread Factor
 - Low exothermic reaction temperature, reduces fire and burn risks
 - Non-harmful to pipeline coatings
 - Water permeability and superior adhesion, reduces risk of pipeline trench washout
